Phoenix Central School District
K-12 Guidance Plan

Introduction
This K-12 Guidance Plan is designed to be a resource for members of the Phoenix Central School District K-12 Student Support Services Team and the Phoenix Central School District educational community. The plan supports the overall mission of the School District by promoting student achievement, college and career planning, and personal social development for every student. Student Support Services team members, using their leadership, advocacy, teaming and collaboration, and data driven decision-making skills, will ensure that every student in the Phoenix Central School District will have access to a quality and equitable education. This plan is aligned with the Common Core Learning Standards, aligned with the New York State School Counselor Association’s Model Comprehensive K-12 School Counseling Program and enhanced with practical ideas for activities and assessments from the Student Support Services Team in Phoenix.

This is a living document. We encourage the K-12 Student Support Services team to refine this document as further information and resources become available. Counselors are encouraged to use this document as a springboard for further detailing the key components to meet the needs of the student body. It is recognized that the development of any program is a process of continuous improvement, not a one-time event. This plan assumes that the use of data as a powerful planning tool makes school counseling programs more effective. A properly implemented program focuses school resources on student achievement and increases collaboration between educational professionals within schools.

Resources Utilized in the Development of the Plan

- Common Core Learning Standards
- The New York State Model for Comprehensive K-12 School Counseling Programs
- American School Counselor Association National Standards for Student

Phoenix Central School District
Mission Statement

The Phoenix Central School District is committed to a strong educational program that promotes academic and personal growth for all students. Each student will become a productive, responsible, confident individual with a strong academic foundation and the ability to make intelligent choices. Our goal is to cultivate a sense of pride in our students, our schools and our community. The Board of Education, school staff, parents, students and other members of the community share responsibility for this mission.

Core Values

Quality Education Includes:

- **Safety and Health:** Students and staff need a healthy and safe environment.
- **Resources:** A successful education program requires appropriate facilities, equipment, and materials.
- **Respect:** We respect and honor the dignity and worth of ourselves, others, and our environment.
- **Responsibility:** Each person is responsible for what he or she says and does.
- **Courage:** Courage is required to grow, change, take risks, and make commitments.
- **Integrity:** Personal integrity develops as one attends to and becomes increasingly ethical in one’s speech and actions. Adults model this process.
- **Whole Child:** In order for students to be successful, their emotional, social, physical, and academic needs must be met.
- **Collaboration:** The education of our students is a process involving the entire educational community: students, teachers, administrators, non-instructional staff, Board of Education, families, and the community at large.
- **Student Achievement:** Continuous growth and improvement occur when there is use of best practices, and articulated/aligned curriculum, and pertinent data.
- **Recognition:** Acknowledging and celebrating successes, large and small, nurtures growth and a sense of community.

Educational Objectives

The Board of Education upholds and supports the District’s Mission as stated in our Comprehensive District Education Plan by creating and encouraging opportunities for all Phoenix Central School District graduates to become:

- **Self-directed learners**, who use positive core values to create a positive vision for themselves and their future, set priorities, and achievable goals, create options for themselves, monitor and evaluate their progress, and assume responsibility for their actions.

- **Collaborative workers**, who use effective leadership and group skills to develop and manage interpersonal relationships within culturally and organizationally diverse settings.

- **Complex thinkers**, who identify, access, integrate, and use available resources and information to reason, make decisions, and solve complex problems in a variety of contexts.

- **Community contributors**, who contribute their time, energies, and talents to improving the welfare of others and the quality of life in their diverse communities.

- **Quality producers**, who create intellectual, artistic, practical, and physical products which reflect originality, high standards, and the use of appropriate advanced technologies.

- **Ethical decision-makers**, who exemplify the principles of trustworthiness, respect, responsibility, integrity, fairness, caring, and citizenship.

Student Support Services
Mission Statement

All students in the Phoenix Central School District have access to student support staff that will assist students in developing their academic, personal/social, and career college skills. Through a comprehensive student support program, students will:

1. Demonstrate an understanding of their present academic status, achievement, interests, abilities, and educational requirements.
2. Experience greater self-awareness and responsible decision making.
3. Develop interpersonal and effective competencies critical to realizing and achieving their potential.

We educate our students to become respectful and responsible towards self and others.

NEW YORK STATE MODEL FOR COMPREHENSIVE K-12 SCHOOL COUNSELING PROGRAMS

Foundation System

The foundation is the basis of a comprehensive school counseling program. It establishes the overall basis for developing a program within the school and sets the philosophy and vision for school counselors.

Components

The Philosophy: Is the set of guiding principles that are used in the development, implementation, and evaluation of the program. The principles are statements of agreement that address all students, focus on prevention, and how school counselors will maintain their professional competencies.

The Vision: Is the future-oriented statement that establishes the program’s direction and the desired outcome for all students. The vision of the program reflects and supports the vision of the School District. The vision sets the tone for the school counseling department and its comprehensive program.

The Mission Statement: Is the guide for the school counseling program. Statements should be specific and clear. Mission statements should take into consideration the beliefs of the school, link to state and District’s statements and reflect the benefits that all students will receive. It should encompass the benefits of a school counseling program.

Sample Statements:

• To assist all students to grow academically, personally, socially and vocationally
• To promote and enhance students’ educational, learning experiences through the development of skills in the domains of academic, personal, social and career.

Program’s Goals: As a driving principle, school counseling programs should develop a set of goals that will guide the program. Goals reflect the three domains of student development and are listed as:

• Academic
• Social/Personal
• Career
Phoenix Central School District  
K-12 Guidance Plan  

The National Standards for School Counseling Programs

The National Standards for School Counseling Programs identify the attitudes, knowledge and skills for students that were deemed important by the profession, clarify the relationship of school counseling to the educational system, and address the contributions of school counseling to student success in school. With accountability driving school improvement there is a critical need to inform stakeholders of the relationship of school counseling programs to student learning and achievement. Most importantly, as critical players in school improvement, school counselors use school data to demonstrate accountability for student achievement and school success.

The National Standards for School Counseling Programs provide a framework for developing and writing the content of a school counseling program. The standards focus on what all students, from pre-kindergarten through grade twelve, should know, understand, and be able to do to enhance their development. The nine national standards, three in each area of academic, career and personal-social development, are considered to be the essential foundation for the content of school counseling programs (Campbell & Dahir, 1997).

The National Standards offer school counselors, administrators, teachers, and counselor educators a common language to promote student success through school counseling programs, which is readily understood by colleagues in schools who are involved in school improvement and the implementation of standards across other disciplines. Comprehensive national standards-based school counseling programs have the characteristics similar to other educational programs including a scope and sequence; expected student outcomes or competencies; activities and processes to assist student in achieving these outcomes; professionally credentialed personnel; materials and resources, and accountability methods. The National Standards for School Counseling are outlined in Appendix G.

The New York State Comprehensive School Counseling Program Crosswalk

The New York State School Counselor Association has developed a linking process for *National Standards in School Counseling Programs’* and the NYS Learning Standards. This document is the NYS Comprehensive School Counseling Program Crosswalk. The crosswalk assists school counseling program and how it matches the content area key ideas for the state learning standards. The learning standards for New York State are in the following content areas:

- Health, Physical Education, and Family and Consumer Sciences
- Mathematics, Science, and Technology
- English Language Arts
- Languages Other Than English
- The Arts
- Career Development and Occupational Studies
- Social Studies

The Crosswalk is a reference document that charts four areas: New York State Learning Standards, the New York State student competency related to the specific learning standard, the American School Counselor Association National School Counseling Standard, the student competency related to the National Standard and the Performance Indicator for the student competency. School counselors should begin by familiarizing themselves with the New York State Learning Standards (see Appendix C). Under each of the content areas, the New York State Education Department has identified learning standards for students.

What are the benefits of the Crosswalk for the following groups?

**Students:**
- Learn academic, personal/social and career skills
- Apply a connection to the learning standards
- Improve their academic achievement and understanding of relationships to the real world

**Teachers:**
- Create interdisciplinary team work
- Address students’ needs
- Support elimination of learning barriers
- Roles are supported through consultation and guidance process
Administrators:
- Integrate school counseling to the academic mission
- Integrate school counseling to the state learning standards
- Support state regulations related to NCLB, SAVE Legislation and CDOS
- Increase staff collaboration and effectiveness

Superintendents and School Boards:
- Support academic, personal/social and career achievements for all students
- Align school counseling programs to the NYS Learning Standards
- Establish standards and competencies for school counseling programs and students
- Produce a high quality school counseling program
- Support collaborative efforts to achieve student success
- Provide effective preventive programs for school districts

In reading the Crosswalk, please follow the legend:
First letter: National Standard Domain:
Academic (A); Personal/Social (PS); Career (C)

Second Letter: Standard (A, B or C)
First number: Student Competency from the National Standards
Second number: Performance Indicator from the National Standards

As an example: A:A 1.1 would mean:
A: Academic
A: Standard A
1: Competency 1
1: Performance Indicator #1 under Standard 1

The purpose of the Crosswalk is to assist school counselors in utilizing the legend as indicators of how a School Counseling Program can assist student academic, personal/social and career achievement. Activities school counselors perform should have the Crosswalk legend as the identity of student competencies to be achieved.

On the next pages are samples of the Crosswalk template that can be reproduced for use in a school counseling program.

Professional school counselors everywhere proudly share the same simple vision — to prepare today’s students to become tomorrow’s adults. The American School Counselor Association (ASCA) not only supports this idea, it has made it the Association’s mission.

Educational reform movements of the late 20th and early 21st centuries, such as standards-based education and the No Child Left Behind legislation, focused on raising teacher quality and academic achievement. Unfortunately, these efforts ignored the emotional, physical, social and economic barriers that can inhibit student success. This is where school counselors make a difference. School counselors are actively committed to eliminating these obstacles and to helping students understand that the choices they make now will affect their educational and career options in the future.

ASCA National Standards for Students was established to help school counselors help students. ASCA National Standards identify and prioritize the specific attitudes, knowledge and skills that students should be able to demonstrate as a result of participating in a school counseling program. Best of all, by adopting and implementing ASCA National Standards, school counselors change the way school counseling programs are designed and delivered across our country.

The Development of Standards
The development of ASCA National Standards for Students required an examination of theory, research and practice to ensure that all aspects of school counseling were considered. The process solicited broad-based involvement from all segments of the school counseling community to determine what purpose the Standards would serve and what their content would be. Through pilot surveys at ASCA’s national Delegate Assembly in April 1995 and a revised survey to more than 2,000 ASCA members in September of that year, ASCA was able to gather input on school counselor attitudes and to initiate the movement toward adopting National Standards.

The standards movement has provided ASCA with a timely opportunity to better define the role of school counseling in the American educational system and establish similar goals, expectations, support systems and experiences for all students across the country. Additionally, on the local level, National Standards offer an opportunity for school counselors, school administrators, faculty, parents, businesses and the community to engage in conversations about expectations for students’ academic success and the role of counseling programs in enhancing student learning.
Finally, ASCA National Standards for Students serves as the foundation for The ASCA National Model: A Framework for School Counseling Programs. Representing more than 50 years of research, theory and practice, the National Model helps school counselors design and implement programs that meet the National Standards and establish school counseling as an integral component of the academic mission of their schools.

ASCA’s decision to participate in this educational reform agenda through the development of National Standards for Students offers an opportunity for the school counseling profession to implement the goals deemed important by the profession, to promote its mission in educational reform and to ensure that all students have access to comprehensive school counseling programs as part of the learning experience.

We look forward to having you join us on this mission!
